

Preliminary proposal

Colony: New Brunswick

Conditions for joining Confederation	Justification
We want an inter colonial railway	We are not connected to main land and we want to have an easier connection so we can successfully trade and travel
Military defence	We want federal military defences because ours are low and an attack from United States is highly possible.
Funding and Financial Stability	Our economics are strongly based from timber trade, and if those resources lower we won't have such a chance to do our part in trading to other colonies and our economy could fall
Funding for agriculture community	We depend so strongly on timber trade and we have other resources on our land and we need funding and support so we could improve on our agriculture and give different resources to everyone around us.
Roads and accessibility within land	We have some tough terrain and it's un reachable from other people so we need roads that can be used to guide people to our land.
The capital should be Saint Johns	It's a great port for trading and it surrounds all the smaller colonies in the west, which makes it an accessible point for trading, meetings, etc.
