Topic Movie History

Key Ideas

Notes

How movies started

- zoopraxiscope = rotating still images
- Edison Kinetoscopic = big box shows image + record plays underneath
- 1895 = cinematography = projected images => 'magic' = first ✓ was of a train = they were very short clips

First Films

told the very first story of film = it's one shot = (story of a robbery). Early film was 'dangerous' because there were chemicals that make it flammable.

Film = business

studios became in control = production facilities.

WWI

1925

America was able to entertain, destruction in WWI. Sound was integrated into movies. (convert theatres to play sounds)

1939

coloured movies = coloured in. longer films = big reels. Switch big reels into

1937 = first animated film

first animation (snow white) drawing = hand draw on see-through animation cells. layers cinerama = movement of camera.

1975

Jaws = summer block buster = studio start breaking down. Actors choose.

Key Ideas

iPad → iMovie

cut

fade

dissolve

wipe

~~Shot-Reverse-Shot~~

'moving images'
(charlie chaplin)
era

1930s (cell animation)

wizard of oz

~~modernize effects~~

Tips for sound

Notes

2nd iPad was the first
one images goes to another
to black or white, bright to dark, is
to connect images.

is more fluid than a cut, quicker than ~~dissolve~~
back and forth between shots (reaction)

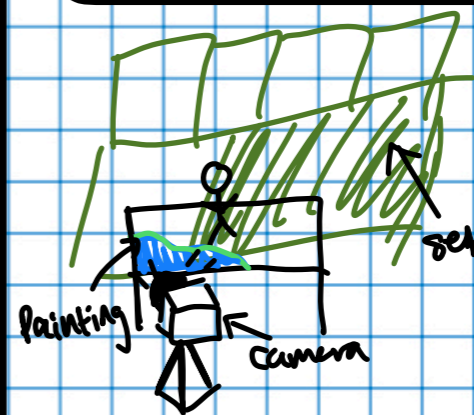

is even considered an effect.
there is a painting in front of camera
(it looks like set is tilting.)

tornado is a big piece of cloth. (effect)

~~digital effects - green screen~~

use house old objects that make
somewhat similar sounds
