

# Dear Future Generations

Dear Future Generations,

Listen up, here's some advice  
For quarrel and chaos to come  
You may forget to think twice  
But, out of fear, don't run

Away from change, away from innovation  
From chances and encounters surprising  
Beware of ill-intended exploitation  
From those who fear the uprising

Dive into the revolution headfirst  
Take a chance to make a change  
For though revolt is unrehearsed  
Life, as well, is never prearranged

Throughout our history we've accepted no less than,  
For us, for our world and for you  
Now you must continue what we've began  
For us, for your world and to simply get through.

Dear Future Generations.

## Analysis

This poem is a message to future generations, asking them to continue our battles and embrace change. It reminds them not to be afraid of uprising or change, and to beware of those who might try to sabotage or resist movements driven by the need for change in society.
