

Intro:

In fair Vancouver where we lay our story
Live two families who strive for glory
Two families in complete competition
Capulet and Montague, opposition is their mission
Fights bring turbulence to the poor land
the mayor now says that fighting is banned.

In our first scene, you meet Romeo and a friend
But it is a sad day, for Romeo at love's end
For he loves a woman, Her name is Rosaline
But she doesn't love him back, and for that we hear him whine
Our two favourite MONTAGUES are headed to a to a party
Such a fete, but hosted by CAPULET!
None the less, depressed Romeo will drink till he's hearty

Romeo and Juliet 2020 // Queen Mab Scene (1.4.35-120)

R: Mercutio, you and I both know we have good intentions for coming to this party, but we are idiots to think that these people... that want to kill us, will see it the same way.

M: Well, I'm sorry Romeo, but you're a bit late with that realization! We're almost there, but they won't realize you're a Montague, it'll be fine. What's really making you back out?

R: Well there was this theory i read on the internet earlier, it was so creepy, cause it was so true.

M: you know what? I heard a pretty good theory too.

R: Oh what did you hear?

M: That conspirators are as faulty as their theories.

R: Faulty? They doubt the things that have been integrated into us, to realise new truths about our world. After all, flat earth was normal at one point.

Ohhh, I see what you're saying!... the CIA has been brainwashing you!... or I suppose they haven't, because YOU are aware of it.

//shakes head and laughs at romeo

//drops into crouch and gets enthusiastic, making fun of romeo

They watch us through hidden cameras no bigger than the diamond on the ring on your mother's ring finger. In fact 99 percent of diamond rings have solar powered cameras in them. The original purpose of cutting the diamond into intricate shapes was to hide the camera with reflections. Cameras are everywhere, drones, the rooms in your house, in the cracks of pavement, traffic lights, public toilets... you know, the one's that flush on their own, with the "motion sensor"*//exaggerated air quotations*

//short pause for intent, then look knowingly at audience/brake 4th wall

Their cameras are everywhere, and not everyone can see what the cameras capture, but those who can, have authority over Ever-Y Thing!

But they dont just watch us, they also control the wills of the majority of the population. They influence our minds and decisions till our free will is what they want it to be. They use the knowledge they collect from the cameras to manipulate us with the media that they own. Facebook, Twitter, Snapchat, Instagram, Youtube, even pinterest! They own it all, control and manipulate it all, so that they can own, control, and manipulate us! *//break 4th wall*. Stop looking at me like that, it's true! The media spreads news, dictates popularity, determines trends. Media tells us what we know, and how we feel about itl.

Just think about it, from day one we're bombarded with technology, posters, radio, even children's games brainwash them. Our children play video games about killing. Video games stimulate dopamine, the chemical in our brains which makes us feel good. These games about killing make you feel good, which your mind connects to killing feeling good. No wonder the news is full of shootings, and violence. It's not the guns, or the laws that are the problems, it's the video games that brainwashed us from the day we were born.

These are the devilish, corporate minds which run our minds, what's good, bad, right, wrong, normal, all subject to what they want. Then when too many of us realize what they're doing, They spread the corona virus to keep us scared, unpopulated, and dependent on their medicine. Man, I'm telling you now, and I'll only say it once... be careful what you say out loud. I am risking my safety by telling you this. Keep your eyes open, and your ear to the ground. Pretty soon you'll notice them following you. This is the machine that dictates how we live, eat, sleap, breathe, and everything in between. We are the machine, and it....

Romeo; OKAYYY! I think that's enough conspiracies for one day, or 10.

//shakes head

You talk of nothing.

Mercutio; true, i talk of conspiracies

Which are made by idle and desperate minds

Conspiracies are as insubstantial as popcorn

they might not be worth anything, but you always have room for some more

Danm, I really want some popcorn now.

R: well maybe there will be some at the party, if we get there before it's all gone. Come on man, you've made us late.

Alex Jones voice
