Reflection:

Looking at your K-W-L Chart, what is something that you taking away from this Guest Speaker session? They were brought in to help you with your current project. How will this persons words help you with your current project?

I took away that everything with a Apple Pencil is possible because looking at her drawings she used her Apple Pencil very well and made cool creative things. Another thing I took away from the session is that She uses shapes to problem solve and she senses shapes to make it more simple.
