

Thesis: Technology has disrupted our lives by giving people a voice in matters they normally wouldn't, and in ways they normally wouldn't. It has done this by allowing people to share their stories, giving them a place with no censorship, and by allowing people to share their thoughts and opinions instantly.

Intro: Define Technology and state thesis

Paragraph 1: Share stories

Topic Sentence: Many people have faced and overcome some insane challenges. Technology gives them a place to tell their story and hopefully make a difference.

- #MeToo- NYT Article fastest moving social change we've seen in decades
- natural disasters/helping others
- Shootings/terrorism and how we have been desensitized

Paragraph 2: Giving people a place with no censorship

Topic Sentence: Many forms of social media have guidelines of what you can and can't share, but there are other places, such as twitter, that have no censorship.

- Compare to Little Brother X-net
- Cyber bullying
- grey area

Paragraph 3: Share thoughts and opinions instantly

Topic Sentence: When you have a thought or idea you can share it with everyone immediately which can be good or bad.

- Hatching Twitter-Original purpose of twitter
- Trump
- Officially create first hand sources

Conclusion: restate thesis and tie everything together.
