

NAME: _____

For the rest of the course we are studying **BIOLOGY**.

To start, we will be linking what we learned about OPTICS, how light travels, and how images form, to the function of the **HUMAN EYE**.

We will be doing the **EYE DISSECTION** on **WED. JAN. 6, 2021**.

We will have a **QUIZ** on all of the content this **THURS. JAN. 7, 2021**.

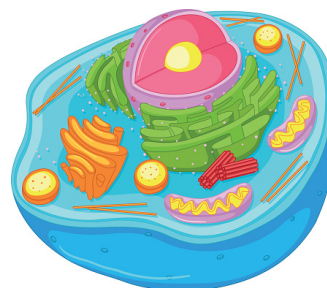

On Thursday, we will start talking about the final **UNIT OF STUDY** for **SCIENCE 8**:

LIFE PROCESSES ARE PERFORMED at the **CELLULAR LEVEL**

What are the Characteristics of Living things?

How do Humans and Microorganisms react?

- Concepts of Cell Theory and Cell parts
- Difference between types of cells
- Difference between Bacteria and Viruses
- How your Immune System works
- Allergies
- Epidemics, Outbreaks and Pandemics
- Eradication of diseases
- Vaccinations
- Assessing Evidence and Bias in data and graphs presented in Media sources
- *Of course, Coronavirus and COVID-19 will be part of all of these lessons.*

Assessments to expect for the rest of the course:

⇒ *The dates listed here may need to change as we progress through the content.*

- A lab report due **January 13th**
- QUIZ on the CELL **January 15th**
- A Microsoft Teams Online Coronavirus Assignment due **January 21st ****
- QUIZ on the IMMUNE SYSTEM **January 25th**
- A (2 minute or less) Presentation: Assessing Scientific Info and Media Sources **January 26th and 27th ****
*(The assignments indicated with ** are associated with each other).*

Identify a **MAIN GOAL** that you intend to work on during the next four weeks of **SCIENCE 8**:
