

User Guide: Kai

Model volleyball player and plp student: Kai, iOS 1.3

PRODUCT GUIDE

Congratulations on your new Kai , Kai 1.3', commonly referred to as "Kai or smiggles." Your new friend comes with functions including, but not limited to, the following:

- Being overcompetitive in any remotely competitive situation but sometimes this function doesn't work and Kai doesn't try
- Kai will sometimes shut down and work cannot be done till a full reset of 1 night
- Kai will always try to be nice but occasionally it doesn't work
- Kai will try to help but sometimes fills his plate and forgets about homework and plans other stuff like the club fair

GETTING STARTED

Before you access Kai/smiggles, you will need to prepare yourself for a very talkative person. Your Kai will respond most best to users who are generally honest.

ACCESSIBILITY

Kai is very easily accessible via Snapchat and iMessage . Kai is often seen in social settings , but he can also be found doing schoolwork and volleyball.

After school, Kai can be reached via Snapchat or iMessage . Kai will do his best to respond snap the fastest but will respond to iMessages when seen , but Kai might not respond after 10pm till 730 am due to relaxing and sleeping.

Kai enjoys hanging out with friends, and always strives to help others via student council, student ambassadors and SEYSA. Kai does not have instagram so if you want to know what your Kai is doing sending a snap if Kai is doing something fun he will show you but if he's not he will most likely respond with a picture of the floor.

SETTINGS

Your Kai has three primary settings: normal overcompetitive and chill.

Setting 1: normal

This is the mode you most often will work with your Kai 1.3. This is his default setting from 7am until the next mode is initiated. Kai is responsible for setting for the volleyball team at seycove. In this mode, he is often seen panicking about something student council related. especially when he is planning something that really interests him. while in normal mode he can be easily distracted.

Setting 2: overcompetetive

While overcompetetive you may encounter Kai playing volleyball basketball or soccer. he engages in many abnormal activities like yelling for no reason and overthinking. Should you encounter him in this setting back away and 2 minutes after Kai is done he will change modes , do not approach Kai when he is like this unless you are the coach or a teammate!wait 2 minutes and you can begin talking to your kai .

Setting 3: chill

When kai is in this mode and you are not telling kai to do something there is a good chance he will be dancing hanging out with friends or watching a show this is when kai is in a good mood and it is hard to snap him out of it. This is when kai will be the most tolerable and telling kai something bad wont have much of a reaction.

WARNINGS

This device may...

- Get into another project and work on the instead of working on what he is supposed to be working on
- Try to help people too much and just get in their way
- Zone out and plan a student council thing
- Talk about something in too much detail

TROUBLESHOOTING

Problem	Solution
If you don't know what Kai doing.	Occasionally Kai will zone out and can't be removed from this glitch unless communicated with.
If kai is to overcompetetive.	Kai want everyone to have fun and asking kai to chill will usually calm down your Kai.
If you want to plan an event talk to Kai that is always an option.	Kai is happy to help people whenever.

TIPS TO MAINTAIN OPTIMAL PERFORMANCE

Kai needs a big breakfast and dinner but kai doesn't eat much of a lunch

Kai usually gets 7 hours of sleep a night but if kai got less then five and a have some functions like math long term focus and others are disabled
