

# User manual

**Brand: Athlete and Student**  
**Model: Kwosen Bruce iOS 1.3**

## PRODUCT GUIDE

Congratulations on your new PLP Student, Kwosen Bruce 1.3, commonly referred to as “Kwosen” or “Bruce” as Zachary likes to call him. Your new student comes with functions including, but not limited to the following:

- . Funny
- . Weird
- . Empathetic
- . Mindful of others
- . Athletic

## GETTING STARTED

Before you access Kwosen for the first time, make sure to know that the Montreal Canadiens are not a bad franchise. Your Kwosen will uncontrollably rant for a good 15 minutes. You have been warned.

## ACCESSIBILITY

Kwosen is mostly available during the night time as he does not like waking up in the morning. You can usually find him sitting in class quietly because he is tired from waking up at 8:45. If he is not doing so he is probably asking his friends 20 questions about the work.

After school he has a lot of soccer and Hockey so its difficult to reach him. He mostly replies during Wednesdays and Mondays when he doesn't have much to do.

Kwosen will sometimes use social media and doesn't really know how to use it that well, in the rare occurrence of him comprehending the social apps he usually debates with his friends about pointless sports opinions.

## SETTINGS

Kwosen has three primary settings: Student, Athlete and regular person.

### Setting 1: Student

You will interface with Kwosen most often in Student mode, so this will be his default setting during the hours of 9:30AM-3PM. In Student mode, Kwosen is responsible for listening to the teachers, writing down notes and doing his work.

Kwosen attempts to listen to the person that is talking and maintaining the level of hype in the classroom. He gets excited when people ask him a question about the work he loves answering them.

## Setting 2: Athlete

In Athlete mode you may encounter Kwosen at the soccer pitch or at the hockey rink. He does all of the normal functions of an Athlete: waking up early, coming home dirty from the Rain and mud from the soccer field, sweating, being exhausted. Should you encounter him in one of these roles, I would suggest to not approach he will be dirty, tired, Sweaty. He is programmed to respond in a positive way but I wouldn't be too sure if you still would want to approach him.

## WARNINGS

This device may...

- . Fall Asleep for no reason
- . Forgets what he was going to say
- . Not know how to operate certain devices
- . Zone out while walking and trip on a rock

## TROUBLESHOOTING

Problem		Solution
He isn't doing the right work assignment		Approach Him and tell him
If you want to learn about soccer		He knows lots about soccer don't be afraid to ask him.
If you're having trouble with social studies		He loves Social studies and would love to help

## TIPS TO MAINTAIN OPTIMAL PERFORMANCE

Fuel with sleep or apple juice.

Make sure to pay close attention to Kwosen as he moves around pretty quick. This device does not like cheese to maintain optimal performance keep a safe Distance from cheese.
