I used this source to find out things about the captain of the St. Louis: Gustav Schröder. He was a big part of the whole St. Louis Vessel because it was his decision how to continue with the refugees. The source tell really good things about Schröders attitude about the Jewish people. It reproduces the opinion and Schröders view of the whole situation really good.

I used this source because I wasn't exactly sure about why the refugees came on that ship and why they were allowed to go on it. It just tells that the refugees rent the ship for the voyage to Havana and everybody bought themselves Visas for Cuba. And they had to flee of the Nazis because they wanted to kill them.

5. What is the MS St. Louis?. *YouTube*, uploaded by cpac, November 8 2018, https://youtu.be/wJuLphm_CqI

This source is a short YouTube video about the St. Louis route the ship had taken. I used this video to image better which route they had taken and how long it took them to ship to America and back. Maybe I can use this source at the end of a presentation about the topic because it's short and explains quick but good what happened.
