

Plate Tectonics

Game Ideas

Everyone is a disaster and you are trying to destroy the most areas

You are trying to get to the end of the game board before everybody dies

You are trying to avoid all of the disasters

One team is trying to kill humans using tectonic plates while the other is trying to stop them

Examples

Pacific

North American

South American

Thoughts

there are multiple tectonic plates

They cause earthquakes

They cause hurricanes

They cause tsunamis

They are underground

They move

Questions

What is a tectonic plate?

What do they do?

Are they dangerous?

How deep underground are they?

Long does it take for them to move?

Which plate is the largest?

Which plate is the smallest?

How big are they?
