launch menu

[the steps to a successful project]

look, listen & learn

[gather information from the world around you; identify problems]

ask tons of questions

[find out more **specific** information; do research]

understand **the** process or problem

[process what you've learned and think about applying it]

navigate ideas

[work out a **solution** to a problem]

create a prototype

[do something]

highlight and fix

[revision required]
